Darren McCarley

Lockheed Martin

Artificial Intelligence (AI) for Sustainable Blockchain Technology

Biography:

Darren McCarley is a Software Developer in Applications at Lockheed Martin's Enterprise IT. He is a recognized subject matter expert in logistics and transportation currently leading teams under Aeronautics' Supply Chain.

Darren brings 25+ years of software development experience focusing on transportation and logistics including consumer goods, wholesale, retail, as well as manufacturing, warehousing, and distribution. Including carrier compliance, hazardous materials, international transportation, and customer compliance.

Since joining Lockheed Martin in 2012, Darren has supported various Aeronautics Supply Chain applications by leading teams primarily focused on transportation and logistics, supplier discipline, process automation, and global applications. In 2016 Darren was challenged to begin R&D relative to Blockchain for Industry and applicable use cases.

Darren is an active volunteer in Youth Sports and STEM programs focusing on community engagement with Lockheed Martin's CodeQuest, Toastmasters International, Aledo Youth Sports, and the Fort Worth Homeless.
