

Terrence Goggin

Deloitte

Topic: Using Discovery Analytics in Computer Security Analysis

Biography:

Terrence is a cybersecurity Specialist Leader in the Federal Risk Management practice. He has proven business leadership and deep expertise in all aspects of offensive and defensive cyber operations.

Before joining Deloitte's Federal practice, Terrence worked advised private organizations on matters of cybersecurity and risk management. Prior to that, he performed a variety of cybersecurity and leadership roles at the US Department of Defense. He also founded PocketMac, a groundbreaking Macintosh software company, which he built into a \$2+MM/year business.

Terrence holds a master's degree from Eastern Michigan University in Information Assurance, with a focus on Offensive Computer Security.

When not at work, Terrence enjoys family time and generally being Dad.
